

Test Graphs

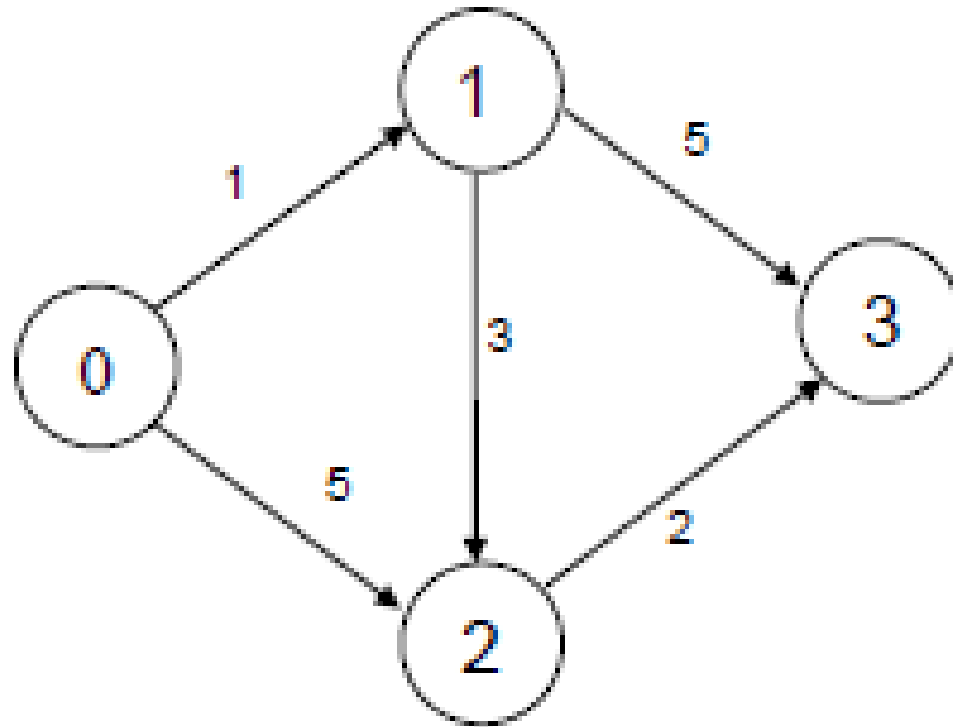

L3Int fall 2021, project

- To be able to defend your project, you must prepare text files in which you'll code all the graphs contained in this document, one file per each graph.
- During the defence, I'll tell you which graphs I'll want you to use.
- I'd like to remind you that during the defence, I may ask you to modify a graph a little bit (adding or changing an edge, changing the weight of an edge...) In this case, you'll have to edit the corresponding .txt file
